PROFILE

Frontend Developer skilled in building responsive and scalable web applications using Angular. Strong background in TypeScript, HTML, CSS, and Bootstrap. Experienced in Agile environments and cross-functional collaboration. Contributed to open-source projects and built real-world applications, demonstrating problem-solving, clean code, and modern UI/UX practices.

WORK EXPERIENCE

Remote Jan 2024 - Present
Freelance Frontend Developer

- Developed a personal portfolio website with responsive design, custom styling, and modern UI/UX.
- Built an admin panel with Firebase backend, featuring dynamic dashboards, CRUD operations, and user authentication.
- Contributed to open-source projects on GitHub: refactored code, improved documentation, and created reusable components (25% increase in forks).

Dolphin-Co Jan 2023 - Dec 2023
Angular Developer

- Assisted in developing and maintaining a responsive e-commerce web platform using Angular.
- Helped design reusable components and services to support scalability and maintainability.
- Collaborated with senior developers and designers to implement UI/UX improvements.
- Worked on bug fixes, UI refinements, and testing to ensure cross-browser compatibility.
- Participated in Agile sprint tasks and daily standups, contributing to timely feature delivery.
